Level 1

L1-Q1. Program57

P

CODE

```
def tuple_operation(tuple1,tuple2):  
    return tuple(sorted(tuple1+tuple2))  
tuple1 = (3,2,1)  
tuple2 = (6,5,4)  
print("sorted concatenated tuple:",tuple_operation(tuple1,tuple2))
```

OUTPUT

sorted concatenated tuple: (1, 2, 3, 4, 5, 6)

L1-Q2. Program1

P

CODE

```
def calculate_average(numbers):  
    total = 0  
    for num in numbers:  
        total += num  
    average = total / len(number)  
    return average  
number = [10,20,30,40,50]  
print("Average:",calculate_average(number))
```

OUTPUT

Average: 30.0

L1-Q3. Program34

P

CODE

```
def find_lcm(x,y):  
    lcm = max(x,y)  
    while True:  
        if lcm% x == 0 and lcm%y == 0:  
            return lcm  
        lcm += 1  
print("LCM of 4 and 6:", find_lcm(4,6))
```

OUTPUT

LCM of 4 and 6: 12

L1-Q4. Program8

P

CODE

```
def count_vowels(word):  
    vowels = 'aeiou'  
    count = 0  
    for char in word:  
        if char in vowels:  
            count += 1  
    return count  
  
print("number of vowels in 'hello':", count_vowels("hello"))
```

OUTPUT

number of vowels in 'hello': 2
